

MAXIMO

Radial 65 Radial 70 Radial 85

Maximo Radial 65

The new Radial 65 range is designed for tractors up to 180 hp. It provides excellent performance, both in the field and on the road. The tread pattern design guarantees gentle ground handling and high traction capability. With its large footprint area and optimal pressure distribution, the tire prevents soil compaction, leading to higher field productivity.

On the road, the Radial 65 ensures easy handling and great comfort, even at high speed. Lower rolling resistance reduces fuel consumption, while the lug shape maximizes wear resistance, delivering long-lasting tires.

Maximo Radial 70

The new Radial 70 range boasts a larger tread width compared to the equivalent products available in the marketplace. This is achievable through an advanced mould design, as well as through the perfect balance between the structure and flexibility of the tires.

The wide and long footprint results in excellent flotation properties, boosting yields and reducing crop stress.

The large footprint area minimizes the soil compaction and ensures outstanding traction.

MAXIMO Radial 70 guarantees high comfort levels for the driver due to the flexible sidewall.

The longer service life of Radial 70, the great traction, as well as the good handling on the road makes the new range the right choice for reduced working time and high cost efficiency.

Maximo Radial 85

The Radial 85 is the ideal multipurpose tire for medium and powered tractors both for field and road application.

The combination of radial technology and tread design provides the **MAXIMO** range with a wider footprint area than the average of the market (+ 5%), for minimum soil compaction and excellent farm productivity.

The unique shape and angle of the lugs of the **MAXIMO** Radial 85 range, guarantee traction capacity and low slippage, generating outstanding power transmission to the ground.

The special inter-lug “islands” improve the self-cleaning of the tire, minimizing the distance required to release mud from the tread, thereby helping with adherence to road regulations.

The tread geometry and the materials used optimize tractor handling and increase wear resistance on road applications. This gives you important economic benefits and environmental respect. The complete Radial 85 range uses environmentally-friendly extender oils only.
